### □ Profile Summary

Data professional with 3+ years of experience in analytics, business intelligence, machine learning, automation, and data-driven decision making across finance, legal, and technology domains. Skilled in Python, SQL, Power BI, Machine Learning, NLP, and Data Visualization. Experienced in building dashboards, developing predictive models, automating business processes, and translating complex data into actionable business insights. Strong background in stakeholder management, data storytelling, statistical analysis, and AI-powered solutions.

### Education

|                                                     |                                       |
|-----------------------------------------------------|---------------------------------------|
| <b>PGDM in Data Science, Shanti Business School</b> | 07/2021 – 05/2023<br>Ahmedabad, India |
| <b>Bachelor of Science, Vinoba Bhave University</b> | 06/2016 – 07/2019<br>Ramgarh, India   |

### 📁 Professional Experience

#### Data Analyst – Jupitice Justice Technology | Ranchi | *Dec 2025– Present*

- Developed SQL- and Python-based data processing workflows for Litigation Management System (LMS) data.
- Performed large-scale data cleaning, validation, transformation, and analysis to improve data accuracy.
- Built analytical reports and KPI dashboards for monitoring litigation trends and case performance.
- Collaborated with cross-functional teams to gather requirements and implement data-driven solutions.
- Supported production deployment, testing, and system optimization activities.

#### Operations Analyst – Shriram Finance Limited | Ranchi | *May 2024 – Nov 2025*

- Automated reporting workflows using Power Automate, Excel, and SQL-based data extraction.
- Designed Power BI dashboards and KPI scorecards for loan disbursement, collections, and operational performance.
- Conducted root-cause analysis on operational datasets to identify process improvement opportunities.
- Improved data quality through validation frameworks and automated monitoring processes.
- Worked with structured datasets to support business forecasting and decision-making.

#### Data Analyst – Zeoys Work-assist Pvt. Ltd. | Lucknow | *Feb 2023 – Apr 2024*

- Performed exploratory data analysis (EDA) using Python, SQL, and Excel on customer and operational datasets.
- Built automated reporting solutions and analytical models to support business decisions.
- Applied statistical analysis techniques to identify customer behavior patterns and operational trends.
- Developed dashboards and data visualizations using Power BI and Tableau.
- Collaborated with business stakeholders to convert requirements into actionable insights.

**Data Scientist Trainee (Internship) – CSB Bank | Remote | May 2022 – Sep 2022 | Churn Prediction |**

- Developed predictive analytics models to identify high-risk customers and forecast churn behavior using classification algorithms.
- Performed feature engineering, model evaluation, and business impact analysis to support proactive retention strategies.
- Achieved 82% prediction accuracy and generated actionable insights through data visualization and reporting.

**Projects & Responsibility**

**Job Recommender System |** GitHub: Panku1080/Invoice-Data-Miner

- Built an AI-driven Job Recommendation System using NLP, TF-IDF, and Machine Learning algorithms to match candidate profiles with relevant job opportunities.
- Implemented skill extraction, semantic matching, and candidate-job similarity scoring to improve recommendation accuracy.
- Developed recruiter-facing dashboards for monitoring candidate-job fit and recommendation performance.

**ATS System (Applicant Tracking) |** GitHub: Panku1080/ATS\_PROJECT

- Developed an AI-powered Applicant Tracking System (ATS) capable of resume parsing, candidate ranking, skill extraction, and job matching using NLP and Machine Learning.
- Implemented automated candidate scoring, recruiter-friendly candidate recommendations, and intelligent profile screening workflow.
- Designed structured data extraction pipelines to convert unstructured resumes into searchable candidate profiles.

**Customer Segmentation (Marketing Analytics)**

- Applied **K-Means clustering** on customer purchase and demographic data to identify key customer groups.
- Segmented customers into **high-value, discount-seekers, and frequent buyers**, enabling targeted marketing campaigns.
- Used **Python (Pandas, scikit-learn)** for preprocessing, clustering, and visualization.
- Delivered insights via **Power BI dashboards**, helping the marketing team improve campaign ROI.

**Key Skills**

- **Analytics & BI:** Power BI, Tableau, Excel (Advanced), KPI & Dashboarding, MIS Reporting.
- **Data Science & ML:** Python, Pandas, scikit-learn, TensorFlow, NLP, Generative AI, and Statistical Analysis.
- **Databases & Cloud:** MySQL, SQL queries, AWS.
- **Tools & Automation:** Power Automate, Plotly, ETL, Data Pipelines and Power Apps.
- **Soft Skills:** Business Insights, Stakeholder Management, Data Storytelling.

**Languages**

English · Hindi
